

New McCormick X4.70 tractor model is now available to collectors from dealers

Farm model collectors will be impressed by one of the latest releases from Universal Hobbies – a 1/32 scale reproduction of the McCormick X4.70 tractor.

With 107hp from a compact Deutz engine, the real machine is one of three newcomers from McCormick manufacturer Argo Tractors that covers a host of applications from groundscare to livestock farming.

The cab is a real attraction, being spacious but well proportioned, and featuring a slim roof panel that keeps overall height to a minimum without making the cab interior feel confined.

In fact, the large windscreen, rear window and full-size doors both sides make the four-post cab a light and airy place to work, with controls laid out logically and at an angle that makes them easy and comfortable to use.

These features are faithfully represented on the new model version, right down to the orange-coloured shuttle lever on the dashboard, the fender-mounted hitch switches, and the amber turn indicators and roof beacons.

Measuring 13cm long, just 7cm wide and 8.6cm high, the McCormick X4.70 available from McCormick dealers makes a stylish addition to any model collection.
