

PRESS RELEASE – December 2015

## Spacious cab an attractive feature of new McCormick X4C tractors

- McCormick X4C range comprises four all-new cab or platform models
- Power outputs from 64hp to 76hp with choice of transmissions
- Open platform or new cab design with big glass area and low height

Apart from the GM compact and F Series orchard tractors, the all-new X4C models are the smallest tractors in the McCormick range.

Designed for applications that do not demand a lot of power but where light weight and compact dimensions are important characteristics, the tractors offer a choice of four power outputs.

Latest Deutz engines with good fuel economy and simple emissions control technology feature under the bonnet of the 64hp X4.20C, 69hp X4.30C and 76hp X4.40C. The 75hp X4.35C has a Perkins engine to the preceding emissions standard, which gives it a distinct price advantage while stocks last.

“The McCormick X4C design is unlike anything we’ve had in the range before,” points out McCormick product specialist Paul Wade at GB distributor AgriArgo UK. “These are thoroughly modern tractors with a great choice of features and specifications to suit different users and applications.”

Among those spec choices are two- or four-wheel drive; an open platform or modern driver’s cab; a Speed Four 12x12 or 16x16 creep transmission; synchro or power shuttle; and 2.7 tonne or 3.4 tonne linkage capacity.

Hydraulic resources are provided by a 49-litre/min gear pump supplemented by a 28-litre/min pump dedicated to steering – equivalent to a 77-litre/min combined system.

“The designers at Argo Tractors have given a lot of attention to the cab for the McCormick X4C tractors to ensure it provides a comfortable and practical workplace,” says Paul Wade. “It’s quite a challenge making a cab to fit a small tractor that’s in proportion but gives the operator plenty of space and good visibility – but the designers have achieved that.”

A narrow header rail creates a deep windscreen for maximum forwards visibility; full-size doors provide easy access with no 'B' pillars to interrupt the view to either side; and controls on the right-hand console are angled towards the driver making them easy to use.

The novel idea of housing the cab air filters in the rear pillars makes them easy to reach for cleaning and results in a slim roof panel for low overall height – the tractors measure just over 2.4m to the top of the cab on 16.9R30 rear tyres.

Prices for the range start at just £21,750.

## Ends

McCormick X4.40C Series 01a

*The 64-76hp McCormick X4C is an all-new design with latest-spec fuel efficient engines and a choice of 12x12 or 16x16 transmissions.*

McCormick X4.40C Series 02

*The 64-76hp McCormick X4C is an all-new design with latest-spec fuel efficient engines and a choice of 12x12 or 16x16 transmissions.*

McCormick X4.40C Series 04

*The tractors are ideal for haymaking, pasture maintenance and other light field operations, and are ideal for work in and around buildings.*

McCormick X4 Series cab inside 01

*High quality materials, fit and finish make the McCormick X4C tractor cab a pleasant workplace. Instruments adjust with the steering wheel and the console layout makes controls easy to use.*

McCormick X4 Series cab inside 02

*An optional fold-away training seat sits alongside the mechanical or air suspension driver's seat. An RDS radio with Bluetooth and mp3 player is standard.*

McCormick X4.35C 2wd 01

*Two-wheel drive is available for applications where the extra traction of a front drive axle are not needed.*
